MAESTrO is one of the world's most trusted sources of information on regulatory and reimbursement information for new health care technologies.

With no centralised repository of information and outcomes for the world's major regulatory and reimbursement agencies, it can take endless hours to find, extract and understand relevant data.

MAESTrO is the solution to this problem.

As one of the world's largest database of its kind, MAESTrO provides clients with comprehensive comparative analysis and the latest information on key decisions from the world's leading health care technology regulatory and reimbursement agencies.

Why MAESTrO

What sets MAESTrO apart is the depth of information and analysis available. We understand clients need assurance they are receiving all the relevant information in a straightforward and intelligent format, which is why MAESTrO has been specifically designed with targeted searchable information.

Where does MAESTrO get its information

Dating as far back to 1999, MAESTrO has drawn comprehensive information from a range of key global regulatory agencies including the Therapeutic Goods Administration (Australia), Food and Drug Administration (United States of America), European Medicines Agency (Europe) and Therapeutic Goods Directorate (Canada).

In addition, information from the major global reimbursement agencies is captured including the Pharmaceutical Benefits Advisory Committee (Australia), Canadian Drug Expert Committee (Canada), National Institute for Health and Care Excellence (England) and Institute for Quality and Efficiency in Health Care (Germany).

What can you search for?

All entries have been categorised to allow users to search by:

- Technology type (medicine, vaccine, blood product, diagnostic agent, device or procedure)
- Full technology name (fluticasone furoate)
- Disease/condition (type 2 diabetes mellitus)
- Therapeutic area (oncology)
- Regulatory/reimbursement agency (FDA, PBAC)
- Applicant/sponsor (Novartis)
- Policy issue (risk share agreement)
- Submission detail (initial, resubmission, full, abbreviated)
- Comparator/s (primary, secondary)
- Economic evaluation type (CUA, CEA)
- Meeting
- Calendar year

MAESTrO displays outcomes for multiple patient populations and sub-groups to enable superior search capability.

We understand how important timely, relevant information is to clients, which is why MAESTrO is designed to provide an easy to use interface that gives you all the information you need from one simple search.

Using one of the many search functions, MAESTrO will automatically identify and link all relevant sub-searches instantly,

providing you with a complete history and analysis. More recently, outcomes with multiple patient populations or sub-groups have also been expanded to enable improved searching by disease or condition. Company merger and acquisition activity has been captured to create a complete history. All the hard work has been done for you so you can make more informed decisions faster.

Want to know more about MAESTrO?

MAESTrO has been designed and led by Michael Wonder, an expert with more than 20 years international experience in the assessment of new health care technologies. If you would like to know more about how MAESTrO can help you or your business, please contact us via one of the following methods:
